

Agoras (\$AGRS)

EMPOWERING THE FUTURE OF THE DECENTRALIZED AI ECONOMY

Agoras (\$AGRS) is the cryptocurrency powering Tau Net's economy. It facilitates trade in knowledge, computational resources, and advanced financial instruments.

Knowledge

Trade knowledge and expertise for AGRS.

Computation

Monetize or rent computational power.

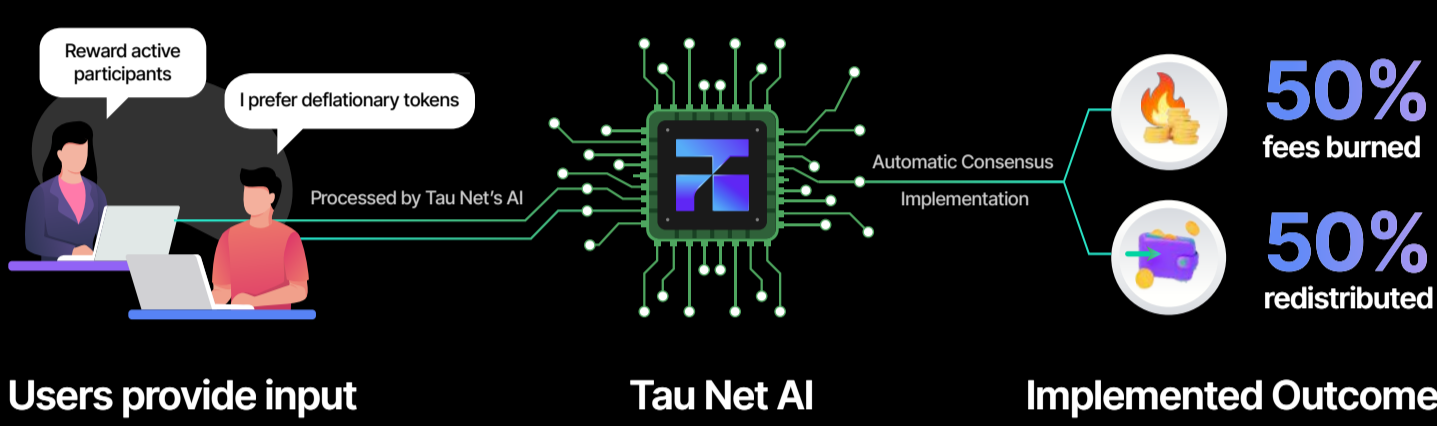

Derivatives

Access advanced financial tools

Agoras offers unmatched control, dynamic utility, and adaptability for its users

Collaborative Tokenomics

Agoras is the first cryptocurrency with fully user-controlled tokenomics.

Example: Users vote to make AGRS deflationary by burning 50% of transaction fees and redistributing the rest to active wallets

Agoras in Action

Knowledge Market

Joe pools 3000 AGRS to obtain a scientific discovery.

Tau Net combines the knowledge contributions of **Sarah, Alex, and Bob** into a complete, logical solution, with AGRS distributed to contributors.

Computational Asset Market

Alex utilizes AGRS to rent computational resources, including GPUs & other devices.

Providers earn AGRS for their contribution, creating a decentralized marketplace for hardware power.

Financial Market

Sarah earns interest on her AGRS in a derivatives market.

Tau Net ensures **secure** and **accurate operations**, aligned with user specifications for stable, inflation-free growth.

Agoras Benefits

Features	Agoras	& others
Tokenomics	✓ Fully user-controlled and adaptable	✗ Governed by developers with limited user input
Security	✓ Correct-by-Construction with proof of correctness	✗ Vulnerable to hacks and exploits
Use Cases	✓ Versatile: Knowledge, computation, finance	✗ Focused on payments or specific niches
Governance Model	✓ Advanced real-time consensus integrating all user inputs	✗ Outdated voting mechanisms and hierarchies that exclude many users
Evolvability	✓ Dynamically evolves based on user consensus	✗ Protocol changes require developer consensus
Interest Model	✓ Always aligned with user consensus, whether inflationary or deflationary	✗ Typically inflationary (e.g., mining/staking rewards)
